Ball-Chatham Educational Foundation

The **Ball-Chatham Educational Foundation** has been created to complement and enrich the educational opportunities of our students. The purpose of the foundation is to draw together the various resources of the business, community groups, and individuals who are interested in enhancing educational opportunities in our school district.

“The 21st Century Classroom”

Our teachers have requested funds for inter-active, electronic white boards. By incorporating multi-media and hand-held student response devices, teachers will be better able to focus students attention. The ability to create more engaging lessons increases participation, improves learning and reduces discipline problems.

Please help us help your children by making a monetary contribution today!

To date, two of fourteen white boards requests have been filled. The approximate cost of each CACH white board is \$3,500. **Every dollar helps.**
